

Nykaa Fashion Customer Churn Prediction Dashboard

Which customers are at risk of churning and what should the retention team do?

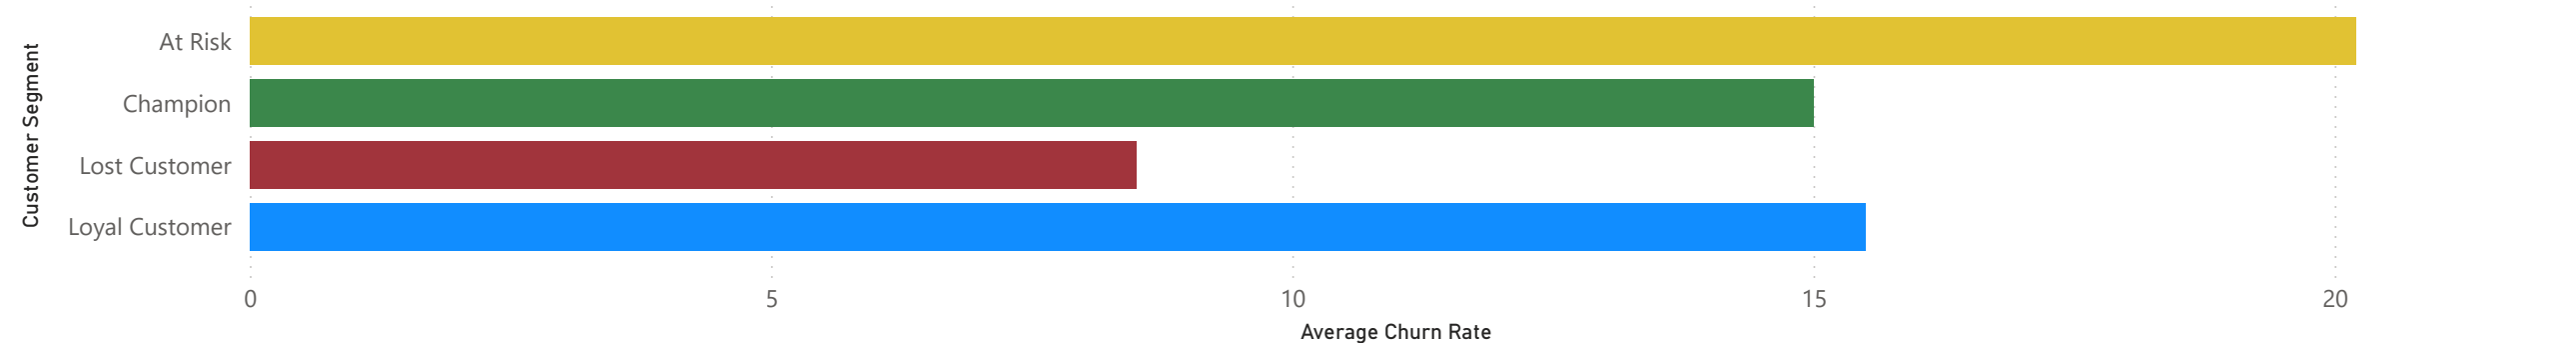

Total Customers	Overall Churn Rate	High Risk Customers	Decision Tree Model Accuracy
5630	16.84%	425.00	89.3%

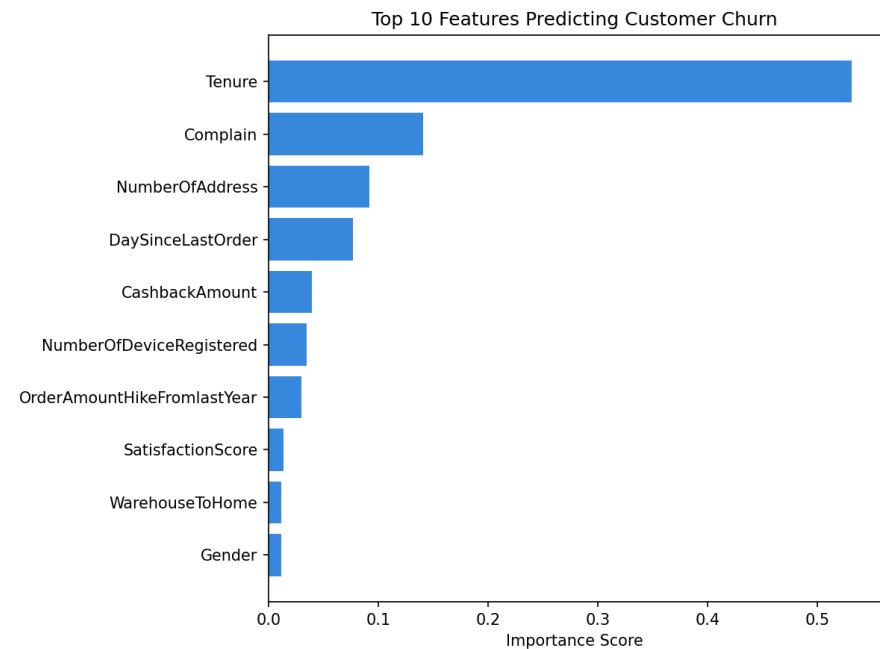

7.55% of customers are at high risk of churning, representing 425 customers who need immediate retention action.

Deep Dive Analysis

Churn Rate by RFM Segment

Lost Customers churn at 8.5% vs Champions at 15%, a 6.5% difference, meaning the CRM team should prioritise re-engagement by segment.

RFM Table		
RFM Segment	Customer Count	Avg Churn Rate
Loyal Customer	3070	15.50
Lost Customer	129	8.50
Champion	592	15.00
At Risk	1839	20.20

The top predictor of churn is tenure, customers who score high on this metric are more likely to leave.

Retention Campaign Framework - 3 Tiers

HIGH RISK ($\geq 70\%$ churn probability) - 425 customers

The Campaign: 'We Miss You'

Action: Personalised 20% discount email within 24 hours → if no response in 3 days, WhatsApp with free shipping → if no response in 7 days, personal customer service call

MEDIUM RISK (40–70%) - 499 customers

The Campaign: 'Stay With Us'

Action: Early access to new collections + loyalty points bonus + personalised style recommendations call

LOW RISK ($<40\%$) - 4706 customers

The Campaign: 'Champion Program'

Action: VIP programme invite + referral bonus + early sale access
